

# Mystery Number

Use the clues to find the mystery number. Each clue will help you eliminate one or more numbers in the chart. Place an **X** on each number you eliminate. The number that is left is the mystery number.

## Clues:

- The number is odd.
- The number is divisible by 7.
- The number is less than 70.
- The number's digits added together equal more than 7.
- The number's ones digit is larger than its tens digit.
- The number is not divisible by 5.

25	50	91	54	27
